## FUN & LEARNING

We are a club for kids who love to play soccer without constant adult feedback. We believe successful performance in games involves players solving problems, not being explicitly told solutions.

---

## PLAY

Our practices are game based. Through play, we encourage curiosity, exploration and self-organization.

---

## LONG TERM DEVELOPMENT

We are not looking to identify talent, we want to nurture it. We see benefits in teams of mixed abilities. There is no evidence to support "the best with the best" claim.

---

## COLLABORATION

We believe soccer is about community and supporting others. Please explore our website for a better understanding of our club philosophy to make sure we are a good fit for you and your child.
